

Arduino

spring 2013

Your Arduino toolkit and skills. Our secret ingredient. The hackerspace's resources. A small budget for additional stuff. After 12 hours of hacking a winner will arise, but every team is going home with hardware! Seats Limited. @heatsynclabs
140 W Main St. Mesa Arizona. FREE.

Sponsors

What to expect

- *A full day of hacking. Bring whatever you need to be comfortable.*
- *Positive fun people. Don't be shy, we've got ticket types for newbies to advanced hackers.*
- *To be matched together on a team on arrival. No you can't be on your buddy's team.*
- *Delicious food provided by our sponsors. If you have dietary restrictions please contact us for accommodation.*
- *A full house! Don't bring more than you need, or expect to bring any spectators.*

Rules

Rules will be limited to respect creativity.

- Must consent to video and photos throughout the event.
- Must use our ingredient.
- Must use Arduino (this can mean Arduino clones using Arduino code or Arduino TM boards running straight Atmel code).
- Budget must be limited, proof with receipts, price matching, etc. All contingent upon judge approval.
- Must put source code, hardware, and BOM on github day of event when we call contest to a close.

When in doubt, our benevolent dictator judges will make the call. Or break the rules and go for the Jury prize, selected by your peers, instead!

Location & Parking

Parking in back of the location, on street, and north and south of the location. Friday night we will be contending with the 2nd Friday street event so expect to spend some time searching. Saturday parking should be plentiful.
